-Testimonial-

My career in Law Enforcement began in the United States Marine Corps in 1991 I have served in the Capacity of CERT Commander for two Correctional Institutions and currently serving as Warden of the Bedford County Prison. During my Law Enforcement Career I have received 18 Live Exposures with Oleoresin Capsicum Sprays. I received exposures from all Major Manufactures to include stream, cone, foam and double heat units. While all of these sprays had some effect on me such as rapid closing of eyes, respiratory effects and heat none of them had the effect that I experienced with the DPS X-Stream Range Spray.

The DPS X-Stream Range Spray is the first live exposure where I experienced a Sensory Overload. This extremely effective spray was fast acting taking effect over my eyes and respiratory system almost immediately. During my 18 live exposures I have been sprayed with many products claiming that they have twice the heat of most sprays however in my experience with those sprays one was no hotter than the other, until I was sprayed with the DPS X-Stream Range Spray. The DPS X-Stream Range was extremely effective.

As a Warden of a County Prison and Trained C.E.R.T. Commander I am always searching for a product to keep my officers safer in this unsafe and unpredictable environment. I have found that product in the DPS X-Stream Range Spray. This product gets the job done and still leaves no long term health or injury to the subject. In addition, with ranges up to 17-20 feet with this stream spray my officers can engage an attacker at a safe distance. I will be switching to the DPS X-Stream Range.

Brian S. Clark / Warden
